

THORN LIE SENIOR HIGH SCHOOL

YEAR 9

Guide to Subject Selection

2018

Introduction

The curriculum at Thornlie Senior High School for students in Year 9 is designed to specifically serve the needs of young adolescents. It is the aim of Thornlie Senior High School that every student has the opportunity to succeed academically so that when they exit secondary school they are literate, numerate, and educated/trained sufficiently well to enable them to take their place in our society as responsible and productive citizens. Thornlie Senior High School strives to foster a caring educational environment based on cooperation, self-responsibility and mutual respect while endeavouring to engage and stimulate students in an ever changing world.

This booklet serves to provide parents and students with the necessary information about the curriculum offerings in Year 9 and to assist students and parents in making informed subject selections for 2018.

Parents and students are encouraged to work together to select an appropriate course for 2018. Should you have any questions regarding course selection please contact the school on 9376 2100 during school office hours (8.00 am – 4.00 pm)

Year 9 Course Selection for 2018

Contents

Curriculum Requirements for Year 9	4
The Arts:.....	5
English:.....	7
Health & Physical Education:.....	8
Humanities & Social Sciences:	10
Languages:	11
Mathematics:.....	12
Science:	13
Technologies:	14

CURRICULUM REQUIREMENTS

Listed below are the course requirements for Year 9 students in 2018. The curriculum is designed to give students an opportunity to experience subjects from the eight (8) different learning areas. From the following table it can be seen that 19 periods are taken up with compulsory subjects. Students need to select 3 more subjects to ensure they are studying a total of 25 periods per week for each semester.

COMPULSORY SUBJECTS	NO. OF PERIODS PER WEEK FOR THE YEAR
English	4
Mathematics	4
Science	4
Humanities and Social Sciences	4
Physical Education	2
Health Education	1
3 electives must be chosen with a maximum of two from any one learning area	
The Arts	
Languages	
Physical Education Specialised Course	NOTE: Only one specialised elective may be chosen
Science - STEM	
Technology & Enterprise	
TOTAL ELECTIVE PERIODS PER WEEK	6
TOTAL PERIODS PER FOR THE YEAR	25

Note:

It is not guaranteed that students will be able to be enrolled in **all** of their requested subjects due to resource and timetable constraints.

If a student selects a high cost elective their enrolment is only guaranteed when their school fees are **paid in full**.

Failure to pay will result in the student being withdrawn from the subject or being unable to participate fully in the subject.

Please complete the student choice selections thoughtfully as the ranked list for each learning area will assist in placing students in the next available subject.

SPECIALISED AND SCHOLARSHIP PROGRAMS

Thornlie Senior High School offers the following Specialist and Scholarship programs:

- Specialist Rugby
- Academic Excellence
- Instrumental Music

Students indicated their interest in one or more of these programs on entering Year 8 and participated in testing, auditions and trials to be considered. Students participating in these programs are invited to continue with the program, if achieving satisfactory progress, through to the completion of Year 10. Other students performing well outside the program may be offered a position in program in English, Mathematics, Science and Humanities and Social Sciences.

THE ARTS

In the Arts Learning Area, students develop creative skills, critical appreciation and knowledge of artistic techniques and technologies in Dance, Drama, Media, Music, Visual Arts and combinations of art forms. The Arts develop the student's sense of personal and cultural identity and equips them for lifelong involvement in, and the appreciation of, the arts.

DANCE - 9DAN

This course builds upon the foundations of Year 8 Dance. Students will establish an understanding of the important role that dance plays in society. Through participation in the Dance course, students develop transferable skills essential to their future. These include communication skills, collaborative teamwork skills, negotiation and conflict resolution skills, problem solving skills, as well as the ability to organise, analyse and evaluate. Participation may lead to opportunities for future study in dance, fitness or related arts fields.

Key learning activities in this course concentrate on choreography, performance and reflection. In particular this course focuses upon on developing strength and flexibility in genres that include Jazz, Tap, Acrobatics, Cheerleading, Pom, Contemporary, Lyrical and Cultural Dance.

Students experience an intrinsic sense of enjoyment and personal achievement through expressing and challenging themselves physically. As a physical art form, dance is able to offer an opportunity for them to achieve an elite level of movement skills. It is essential that students demonstrate safe dance practices and understand health issues that will enhance their general physical well-being and prolong their dance involvement.

GRAPHIC DESIGN - 9GD

Students are introduced to a range of basic and intermediate design processes and practices as well as design materials and technologies. Students learn intermediate drawing skills, the elements and principles of design, design processes, developing visual ideas and concepts, Adobe Illustrator/Photoshop techniques and skills, materials, technologies (including 3D) and designing for a range of industries that can include the advertising sector, book and magazine illustration, brochure design, logo design, posters, leaflets and typeface design.

HIP HOP DANCE - 9HIP

The Hip Hop Dance course aims to allow students who have an interest in different styles of hip hop to work together as a crew to put together performance pieces that are able to be presented at various shows and events. Through participation in the Hip Hop Dance course, students will develop transferable skills valuable to their future.

The core focus will be on developing choreography and performance skills essential for taking part in areas of entertainment such as Thornlie SHS Dance Concert, 'GROOVE- Battle of the West', ACHPER Dance Festival, Telethon and City of Gosnells Carols by Candlelight.

As this course primarily concentrates on student-based teaching and learning, they will experience how to communicate effectively, work in partnership with their peers, negotiate and resolve differences, as well as develop the ability to arrange, examine and reflect upon performance pieces.

MEDIA – 9MED

The Arts Learning Area offers Year 9 students a special program in Media. Students accepted into this exciting course use the latest technologies as they work in areas such as film, television, print media and popular culture.

Media students will develop skills, as they work independently and in groups, in areas such as short action films, television news, animation, game design and comic books.

By doing the Media course students will develop the skills, self-discipline, creativity and confidence that are required for further studies in the area of media.

PIANO KEYBOARD MUSIC- 9PKM

This course provides the beginner musician as well as developing music students with an opportunity to enhance their musical skills through piano keyboard performance. Music literacy, listening activities and ensemble work are covered through the medium of performance. Students will each have access to their own individual keyboard in our lab with headphones to allow them to work at their own pace and level of ability. Students will learn the names of the keys, correct fingering technique to play piano music with 2 hands as well as melody work and chords.

Students who have an instrumental or vocal scholarship within our SIM program are welcome (and encouraged) to enrol in this subject but must also enrol in the scholarship music class as a compulsory requirement to participate in the free instrumental tuition program. Please consider this carefully before making your subject selections

INSTRUMENTAL MUSIC – 9IM

This course continues the specialised music program for all scholarship music students who are learning an instrument or voice through the School of Instrumental Music program. The course is designed to provide intensive training in music through the areas of Aural & Musicianship, Theory & BMK, Arranging & Composing, Performing and History of Music (contemporary).

Students in this program will receive free weekly instrumental or voice lessons from specialist teachers from the School of Instrumental Music and will also be expected to participate in a large group ensemble – Guitar Ensemble (Junior or Senior), Choir or Concert Band to enhance their learning experience and generate opportunities to perform at both music concerts and festivals throughout the year. All students who participated in year 8 scholarship music are expected to continue their music studies in this subject in year 9 in order to continue to receive their free instrumental tuition.

VISUAL ARTS - 9VA

In Year 9, students will continue to develop their visual language, art knowledge, skills and techniques in the design and production of their artworks. They will have the opportunity to experience, adapt and manipulate materials, techniques, art styles/processes when producing 2D and/or 3D artworks. They will be encouraged to display and discuss their artworks with consideration to personal expression and audience. Students will extend their knowledge and use safe visual arts practice.

Students will develop a growing awareness of how and why artists, craftspeople and/or designers are influenced by other artists, their environment and the contexts of culture, time and place as they continue to apply knowledge of techniques used by other artists, in the production of their own work.

Students are required to critically analyse traditional and contemporary artworks using various analysis frameworks, incorporating appropriate visual language, art terminology and conventions.

ENGLISH

In the English Learning Area, students learn about the English language - how it works and how to use it effectively. They develop an understanding of the way in which language operates as a social process and how to use language in a variety of forms and situations. They learn to speak, listen, view, read and write effectively.

English is a **compulsory** course and all students will study English for **four** (4) periods per week for the year. Included in this English time allocation, students attend RAGE –a fortnightly reading program in the library.

English courses at Thornlie Senior High School are designed using the Australian Curriculum. These courses are also designed to facilitate a smooth transition into upper school courses.

The English curriculum is built around the three interrelated strands of language, literature and literacy. Teaching and learning programs should balance and integrate all three strands. Together, the strands focus on developing students' knowledge, understanding and skills in listening, reading, viewing, speaking, writing and creating. Learning in English builds on concepts, skills and processes developed in earlier years, and teachers will revisit and strengthen these as needed.

In Years 9 and 10, students interact with peers, teachers, individuals, groups and community members in a range of face-to-face and online/virtual environments. They experience learning in familiar and unfamiliar contexts, including local community, vocational and global contexts.

Year 9 Achievement Standard

Receptive modes (listening, reading and viewing)

By the end of Year 9, students analyse the ways that text structures can be manipulated for effect. They analyse and explain how images, vocabulary choices and language features distinguish the work of individual authors.

They evaluate and integrate ideas and information from texts to form their own interpretations. They select evidence from texts to analyse and explain how language choices and conventions are used to influence an audience. They listen for ways texts position an audience.

Productive modes (speaking, writing and creating)

Students understand how to use a variety of language features to create different levels of meaning. They understand how interpretations can vary by comparing their responses to texts to the responses of others. In creating texts, students demonstrate how manipulating language features and images can create innovative texts.

Students create texts that respond to issues, interpreting and integrating ideas from other texts. They make presentations and contribute actively to class and group discussions, comparing and evaluating responses to ideas and issues. They edit for effect, selecting vocabulary and grammar that contribute to the precision and persuasiveness of texts and using accurate spelling and punctuation.

HEALTH AND PHYSICAL EDUCATION

Health and Physical Education provides students with the opportunity for participation in a variety of physical activities, as well as the study of various 'health' contexts that aim to develop their self-management skills along with the knowledge and understanding to be able to make life long healthy choices.

Health and Physical Education is a **compulsory** course. All students will study Health Education for one (1) period per week, **and** two (2) periods of Physical Education General. Students may also select **one** of the specialised electives for two (2) periods a week if desired.

As part of the Health Education Program studied in Years 8, 9 and 10 at Thornlie S.H.S. and all government schools in Western Australia, a range of contexts, including **SEXUALITY** and **DRUG** Education are covered. Within sexuality lessons, topics of growth and development, puberty, birth, contraception and other such relevant issues are studied. Drug Education includes legal and illegal drugs, their effects and consequences and the concept of harm minimisation.

It has come to our attention that some parents/guardians are not aware of the sensitive nature of some aspects of Health Education. Students are issued with Health Education booklets at the beginning of each semester which will give an indication of these aspects. Please do not hesitate to contact the Health and Physical Education Department at school if you require any further information regarding this on 9376 2100 - Extension 218.

P.E. Uniforms: Parents need to be aware that all students must change for all Physical Education classes. Students are required to wear a plain royal blue shirt, plain black shorts or track suit and sports shoes. "Thornlie SHS" PE shirts and shorts are available for purchase through the school.

COMPULSORY HEALTH & PHYSICAL EDUCATION SUBJECTS

HEALTH EDUCATION - 9HE (Compulsory)

Year 9 Health Education covers a wide variety of topics relevant to today's teenagers. This course focuses on the following topics and issues:

Semester One: Personal Identity, respectful relationships, STI's and contraception, alcohol and drugs
Semester Two: Assertiveness, first aid and healthy practices, online health, conflict resolution and discrimination.

PHYSICAL EDUCATION GENERAL - 9PE

This subject allows students to develop skills across a variety of different sports. In Year 9 the sports of Badminton, Volleyball, Athletics, Soccer and Basketball are covered. The focus of these classes emphasises teamwork and social cooperation under the banner of Sport education.

SPECIALISED PHYSICAL EDUCATION ELECTIVES

All of the following Specialised Physical education courses are high cost units due to bus use, hire of venues, hire of outside instructors and the use of specialised equipment. The subject charges are compulsory. A deposit of 50% of your school fees is required before your child can participate in the courses.

NETBALL - 9NET

Prerequisites: Students **must** be a competent netball player and have an interest and desire to improve their skills. Students are expected to participate in all classes and any associated training or match activities.

This whole year course continues to develop the fundamental skills of netball. The course will focus on individual netball technique and teamwork. From this course, students will be selected to represent Thornlie Senior High School at interschool tournaments and matches. Students will have the opportunity to undertake a Netball Australia accredited umpire course, and have the benefit of occasional guest coaches from Netball WA.

Also for identification while at external venues students must wear the "Thornlie SHS" P.E. shirt. It is compulsory for all students to purchase a TSHS Netball dress, the cost is \$95 which can be bought from the school.

PHYSICAL RECREATION - 9PR

This course provides students the opportunity to achieve the H + PE outcomes in a non-competitive environment. It is designed to give students experiences in a variety of recreational pursuits at school. These *may* include: Archery, Table Tennis, Badminton, Walking, Trangia Cooking, Indoor Cricket, Indoor Soccer, and Bike Riding.

As places in this course are limited students who choose this course must **have** and **maintain** a record of exemplary behaviour. This subject is aimed at students who enjoy playing sports and participating in recreational activities. During the year students will cover a variety of different types of sports/ activities which may not necessarily be covered in the Physical Education general course.

It is expected that students choosing this subject will already possess reasonable sporting skills.

SOCCKER - 9SOC

Prerequisites: Students **must** be a competent soccer player, have an interest and desire to improve their skills and also learn the skills of refereeing and will have the opportunity to officiate soccer games of various levels.

This course continues to develop fundamental techniques and begins to address more advanced individual soccer skills. The emphasis is on advanced skill development and teamwork while maintaining an enjoyment of the game. Students will have the opportunity to represent Thornlie Senior High School at any relevant interschool competitions and matches.

Students are encouraged to wear soccer boots and wear their blue Physical Education shirt to each lesson.

SPECIALISED RUGBY - 9RDP

This course is designed as a continuation of the Year 8 Specialist Rugby Development Program and provides a progression into higher level skill development and knowledge in Rugby Union, Rugby League, Touch and League Tag for Year 9 players.

Students will continue to receive expert tuition from Thornlie SHS Rugby Academy staff, RugbyWA and NRL Junior Development Officers, guest coaches and speakers. Our aim is to continue to develop each student's individual skills, physical fitness, game abilities, and knowledge, so that they may reach their full potential in their chosen code. Within this program we will continue to place an emphasis on personal goal setting, values and leadership skills. Individuals will also be given an opportunity to learn and apply the different officiating skills at matches and carnivals. Students will once again have the chance to gain selection into one of our school representative teams and then compete in one or more of the Union, League, Touch and League-Tag inter-school competitions and carnivals held throughout the year.

Selection Criteria

Successful applicants will need to meet **one or more** of the criteria listed below

- **Successful** completion of the Year 8 Specialist Rugby Course with a final assessment grade of C or higher
- **Hold** a current Rugby Scholarship or Traineeship at Thornlie SHS, having displayed a high standard of performance and behaviour in the Year 8 program
- **Be** offered a Talent Identification Scholarship having attended both a specific skills assessment and an interview with School and Academy Co-ordinators.
- **Be** offered general entry into the program having displayed a keen interest in and suitable physical skills for Rugby Union and Rugby League. **P.N:** This type of entry is only possible should a vacancy exist in the class.

HUMANITIES & SOCIAL SCIENCES

The Humanities and Social Sciences Learning Area develops students' understanding of how individuals and groups live together and interact with their environment. Students develop a respect for cultural heritage and a commitment to social justice, the democratic process and ecological sustainability.

Humanities & Social Sciences is **compulsory** for all students in Year 9. Students will study HASS for **four** (4) periods per week for the year.

Humanities & Social Sciences aims to provide students with the skills, understandings and values to be effective citizens in Australian society.

HUMANITIES & SOCIAL SCIENCES – 9HASS

In Year 9, Humanities and Social Sciences consists of Civics and Citizenship, Economics and Business, Geography and History: Students develop increasing independence in critical thinking and skill application, which includes questioning, researching, analysing, evaluating, communicating and reflecting. They apply these skills to investigate events, developments, issues and phenomena, both historical and contemporary.

- Civics and Citizenship

Students continue to build on their understanding of the concepts of the Westminster system, democracy, democratic values, justice and participation. They examine the role of key players in the political system, the way citizens' decisions are shaped during an election campaign and how a government is formed. Students investigate how Australia's court system works in support of a democratic and just society.

- Economics and Business

Students are introduced to the concepts of specialisation and trade while continuing to further their understanding of the key concepts of scarcity, making choices, interdependence, and allocation and markets. They examine the connections between consumers, businesses and government, both within Australia and with other countries, through the flow of goods, services and resources in a global economy. The roles and responsibilities of the participants in the changing Australian and global workplace are explored.

- Geography

The concepts of place, space, environment, interconnection, sustainability and change continue to be developed as a way of thinking, which provides students with an opportunity to inquire into the production of food and fibre, the role of the biotic environment and to explore how people, through their choices and actions, are connected to places in a variety of ways. Students apply this understanding to a wide range of places and environments at the full range of scales, from local to global, and in a range of locations.

Biomes and food security are the main focus of study in this unit. Students examine the role of the environment and its role in food and fibre production and the challenges that result from expanding production in the future. Students will also examine the connections between people and places and the effects of transport and information technologies.

- History

Students develop their historical understanding through key concepts, including evidence, continuity and change, cause and effect, perspectives, empathy, significance and contestability. These concepts are investigated within the historical context of the making of the modern world from 1750 to 1918. It was a period of industrialisation and rapid change in the ways people lived, worked and thought. It was also a period of nationalism, imperialism and the colonisation of Australia. They consider how new ideas and technological developments contributed to change in this period, and the significance of World War I.

LANGUAGES

In the Languages Learning Area, students learn to communicate effectively in languages other than English. They gain an understanding of other societies, the ability to interact with people and cultures other than their own and practical skills which they can use in future social, cultural and vocational areas. Through Languages, students are also able to further develop their skills and understanding in English and of literacy in general.

Languages are an integral part of a balanced academic course of study. All students with an aptitude and interest in languages are strongly encouraged to continue their studies into Year 9 and beyond.

If students elect to study a language they **MUST** select the same language they studied in Year 8. Students may study **ONE** of the following languages for **two** (2) periods a week for the year.

ITALIAN - 9ITA

Students will revise and extend their knowledge of Year 8 Italian through speaking, listening, reading and writing activities. Topics such as Italian people and places, food, socializing and following directions will be covered.

Cultural emphasis in the course enable students to expand their knowledge of how other people live in the modern world, reflect on intercultural exchanges and the way in which language is used to establish relationships, indicate social values and enhance reciprocity. Learning is further enhanced with the use of ICT skills.

JAPANESE - 9JPN

An additional language is a valuable asset in a rapidly globalising Australia. Being able to communicate with people around the world gives students the chance to learn more about their own lives, as well as the lives of others.

Japan is one of Australia's closest friends in our Asia-Pacific neighbourhood. Japan remains our second-closest trading partner, and Japanese-speaking Australians are highly-valued employees all over the world.

Japan and Australia participate in close cultural exchange. From dance to painting, music to sport, learning more about Japanese language and culture will open students' eyes to a history and people that are constantly changing, and always fascinating.

In Year 9, students will build on the skills they acquired in Year 8, and explore the culture and language of Japan through the topics of school life, family and holidays.

PLEASE NOTE THAT ENROLMENT IN YEAR 9 JAPANESE REQUIRES COMPLETION OF YEAR 8 JAPANESE.

MATHEMATICS

In Mathematics, students will learn to use ideas about number, space, measurement and chance, and mathematical ways of representing patterns and relationships, to describe, interpret and reason about their social and physical world. Mathematics plays a key role in the development of students' numeracy and assists learning across the curriculum.

Mathematics is **compulsory** with all students studying Mathematics for **four** (4) periods per week for the year.

Students in Year 9 will be exposed to mathematical concepts appropriate to the ability range of the students.

The class allocation (based on Year 8 achievement) will provide students with the maximum opportunity to progress and demonstrate achievement.

MATHEMATICS - 9MA

By studying Mathematics, students develop the ability to:

- appreciate the essential role mathematics has had, and continues to have in their lives, and that of the community
- demonstrate interest, enjoyment and confidence in the pursuit and application of mathematical knowledge, skills and understanding to solve everyday problems
- use mathematical thinking processes and skills in interpreting and dealing with mathematical and non-mathematical situations.
- explore and apply Problem-Solving strategies when dealing with situations when no solution method is obvious, and the solution method is not given in advance.
- demonstrate perseverance in undertaking mathematical challenges
- describe and analyse mathematically the spatial features of objects, environments and movements.
- use direct and indirect measurement and estimation skills to describe, compare, evaluate, plan and construct.
- use their knowledge of chance and data handling processes in dealing with data and with situations where uncertainty is involved.
- use numbers and operations and the relationships between them efficiently and flexibly.
- use algebraic symbols, diagrams and graphs to understand, to describe and to reason.

SCIENCE

In the Science Learning Area, students learn to investigate, understand and communicate about the physical, biological and technological world and value the processes that support life on our planet. Science helps students to become critical thinkers by encouraging them to use evidence to evaluate the use of science in society and the application of science in daily life.

Science is **compulsory** and all students will study Science for **four** (4) periods per week for the year. Students may also select **one** of the specialised electives for two (2) periods a week if desired.

SCIENCE – 9SC

All science students follow a program developed around the four content strands of the Australian Curriculum: Earth and Space Science, Chemical Science, Biological Science and Physical Science as well as the process strands Science as a Human Endeavour and Science Inquiry Skills.

Special programs have been developed to:

- (i) accelerate selected groups through the curriculum to enable them to enhance their scientific skills and knowledge in the different science disciplines.
- (ii) consolidate other groups by allocating more time on process skills and mastering concepts of Science. Such a group has limited numbers to allow teachers to give more individual attention.
- (iii) All students have the opportunity to move between these programs.

SCIENCE ELECTIVE SUBJECT

The Science Learning Area offers an elective Science unit for those wishing to do further studies in Science in addition to the above compulsory unit. Enrolling in this elective will replace one of the three

STEM ELECTIVE – 9STEM

The aim of the course is to allow students to integrate and apply their science, technology, engineering and mathematical (STEM) skills. Project based inquiry learning is used to develop their capabilities in these areas. Throughout the course, students will collaborate and work effectively in teams. They utilise their communication, time management and leadership skills to produce innovative solutions. Students will use current technology to design, create, program and test robots, animations and game applications to respond to their commands, overcome obstacles, and complete set challenges. They will build on their understanding of electrical and mechanical scientific concepts, while computing accurate solutions using mathematics. They will practice creative thinking, with analytical and problem solving skills to engineer solutions to real world problems.

Select groups will participate in the State Robocup Junior and First Lego League competitions using our LEGO Mindstorms NXT robots, with the possibility to compete on a National level. They will also be building and testing solar vehicles, sponsored by the STELR Program initiative of the Australian Academy of Technology and Engineering, and the Australian Power Institute.

The course aims to build on students' interest in STEM and highlights the widening range of education pathways and career opportunities in these fields. Many industries are becoming more focused on innovation and creativity, which will be fostered in this course. There will be exposure to industry and university experts who will present the latest technologies to the students. This course exposes them to computer science, engineering and ICT career pathways.

TECHNOLOGIES

In the Technology and Enterprise Learning Area, students apply knowledge, skills, experience and resources to the development of technological solutions that are designed to meet the changing needs of individuals, societies and environments. Students become innovative, adaptable and reflective as they select and use appropriate materials, information, systems and process to create solutions that consider the short and long – term impact on societies and environments.

The Technology and Enterprise learning area comprises three departments – (i) Digital Technologies and Business, (ii) Design and Technology, and (iii) Home Economics.

DIGITAL TECHNOLOGIES AND BUSINESS

COMPUTER ENGINEERING - 9CE

Looking at a career in the computer industry? This course will get you off to a great start. Students will cover a broad range of essential learning topics such as:

- Introduction to the Personal Computer
- O.H.S.
- Step by step computer assembly
- preventative maintenance and troubleshooting
- Operating systems
- Laptops and portable devices
- Printers and scanners
- Networks
- Security
- Communication skills

Students will have access to some Labs from CISCO 'IT Essentials' – a high quality online learning course.

Students will also have the opportunity to complete some Units of Competency from the Certificate II in Information, Digital Media and Technology - ICA20111. The entire Certificate is completed in Year 10 Computer Engineering.

Note: This qualification may be / is subject to change due to Training Package review.

Trading as an RTO (Registered Training Organisation), Thornlie Senior High School is required to supply all students with extended information on Courses and Policies before entry into the course. Please read the VET (Vocational Education and Training) Courses Information Booklet 2018 if you are electing to take a VET subject.

FLASH ONE - 9FO

This course is designed around Multimedia applications and their uses. Software includes macromedia products such as Flash, Director, Adobe Photoshop, Movie Maker, Sound Studio and Game Maker. Students will create digital photographs, DVD menus, their own sound samples, plug ins for WebPages and simple games. This course is a good introduction to software and basic computing with a hint of the fun stuff. Imagination is required.

SMALL BUSINESS ENTERPRISE – 9SBE

This course will cover the development of skills in a wide range of study within the business field. In this course, students have the opportunity to plan and develop small business ideas within small work groups, integrating different forms of technology and business processes. Using a combination of theoretical and practical business knowledge and skills, students will investigate, plan and evaluate business ideas. The real-time viability and success of their business ideas will depend on their ability to work collaboratively in a team in a simulated business environment. This is an excellent subject to introduce students to the real world of how small businesses start up and evolve. This course is perfect for motivated students with creativity, imagination and a can-do attitude.

COMPUTER PROGRAMMING – 9CP

A pathway to yr. 10 computer programming, computer science and applied information technology

Understanding of computer programming, databases and game creation is a very useful skill to have in this day and age. Computer Programming covers the basics of programming and is a good lead up to the computer science course in Years 11 and 12. This course covers basics such as HTML and networking basics but mostly revolves around object-oriented programming such as Scratch to create games. Basics of databases and design will also be covered. In this subject students will be writing code for both webpages and game creation. Hardware and networking devices will also be covered to give students an overall grounding in information technology and how the world really works.

The course focuses on the practical creation of programs and games but also the grounding of theory and problem solving to encourage these skills to progress in further years.

Students will need good problem solving skills, logical thinking and the acceptability of new ideas is necessary. Students will create programs, web sites and games that incorporate real world skills.

DESIGN AND TECHNOLOGY

ENGINEERING SYSTEMS - 9ES

This course is designed to give students experiences and skills in a broad range of Engineering Systems. Students will learn practical skills in Welding (Arc, MIG & Oxy/Acetylene), tool maintenance, manufacturing and machining.

Students will also learn small engine theory, maintenance and repair procedures. This course will give the student an opportunity to make a range of interesting and useful projects as well as working on their engines. There is a strong focus on Occupational Health & Safety for all students working in this course. This course is relevant to anyone who is planning to apply for a trade apprenticeship in mechanical or metals engineering.

MATERIALS TECHNOLOGY – 9MAT

Materials Technology is about students making a range of interesting projects that build on skills introduced in the Year 8 course. Many of the designs are craft orientated and encourage students to use a variety of materials including wood, metals and plastics either separately or in combination.

Students will also learn how to safely use workshop equipment such as woodworking and metalworking lathes, bending equipment, electric drills, jigsaws, finishing machines, electric sanders, oxy-acetylene equipment and buffing machines. This course has a strong focus on design, safety and the enjoyment that comes from making a range of attractive and useful projects.

TECHNICAL GRAPHICS - 9TG

This course has a strong emphasis on applying computer technology in teaching and developing skills in drafting and technical illustration. The learning opportunities in this course have a direct relevance to the skills required by industry, TAFE and universities. The primary areas of study in this course are:

- *Architectural and Mechanical Drawing*
- *Pictorial Drawing and Technical Illustration*
- *Intro. AutoCAD – Industry standard Computer Aided Drafting software*
- *Rendering of Drawings*
- *3D modelling software*

Students will produce a folio that includes computer-generated drawings as well as sketches, illustrations and designs for a range of different tasks. This course is highly recommended for students looking to develop a career in Drafting, Engineering and/or Architecture.

HOME ECONOMICS

CHEFS JUST FOR YOU - 9CJY

Become a Chef or just learn to create food that others will love to eat. The choice is yours. This course is designed to give students an opportunity to see and experience food creation from the perspective of the food and catering industry with an emphasis on final presentation. There is a high practical content, with a focus on restaurant and "café style" food.

Students will also learn about menu planning, incorporating a variety of different cuisines to meet individual needs in a variety of situations. Students will be exposed to and will prepare a wide range of dishes representative of the needs of different community groups and gain a better appreciation of the values and beliefs that influence food choices.

FABRIC CREATIONS - 9FC

During this course, students will explore various aspects of fashion, and how a person's choice and style of clothing can alter their personal image. After a year in Fabric Creations you will have completed at least 1 fashion garment and also you will have the skills to be able to copy some of the lovely textile crafts that you see on the lifestyle shows on TV. Students will gain practical experience in producing original designs decorating articles and garments made in class using techniques such as fabric painting, machine embroidery and contemporary crafts. This is a great opportunity for the budding fashion or interior designer.

Students will be required to provide fabric for personal items during this course.
