

# BYOD MADE SMARTER & SIMPLER

## Interactive education for an enriched learning experience

The advancement of digital technology has had a profound effect on how schools communicate, work and teach.

Bringing technology into the classroom continues to inspire learning and helps create independent, critical-thinking students - however, sourcing new technology can be challenging and costly for both schools and parents. The introduction of Bring Your Own Device (BYOD) programmes has provided a cost-efficient solution for integrating new ICT into schools and homes across Australia.

JB Hi-Fi Education Solutions can play an integral role in your school's BYOD rollout. Our programme is tailored to your school's specific needs, budget and curriculum requirements. We have specialist advisors that support educators and their families every step of the way to ensure an effective and timely BYOD rollout into your school community.
