

BYOD programme for Smarter Schools

A photograph of three young students in a classroom. Two boys in blue school uniforms are looking at a tablet computer held by a girl with long blonde hair. The background is a bright yellow wall.

Supporting outstanding
learning in the classroom
and beyond.

Education solutions designed for educators, staff, students and families.

Every student needs access to their own device for learning, anywhere, anytime. Every educator needs tools and support to meet their students' diverse learning requirements.

A Bring Your Own Device (BYOD) programme enables your school to plan and deliver education to students using consistent, education-specific devices. And it gives parents access to affordable devices tailored to their school's learning environment.

FOR EDUCATION

A complete solution to support your school

Our Education Specialists can partner with your educators and IT team to design BYOD solutions that meet your pedagogical needs and enable educators to embrace technology and inspire learning.

Benefits for your school:

- ✓ **Exceed expectations**
Give your students, educators and staff tools that inspire engagement, learning and achievement.
- ✓ **Simplify IT procurement and management**
Focus on education while we manage device procurement, deployment and support.
- ✓ **Keep pace with technology**
Deliver the best education experience with technologies for today and the future.

Benefits for your students:

- ✓ **Learn from anywhere, anytime**
Use technologies that work seamlessly and securely in the classroom, on the go and at home.
- ✓ **Embrace the future**
Be engaged in learning through technology and be ready for your future.
- ✓ **Confidence in the process**
Know that you are getting technologies designed for education and priced for value.
